

Beautiful Floating Images Enhance Any Decor

If you're looking for something truly unique for your home or office decor, you will appreciate these striking photographs that float on the wall, or even sit on a desk or shelf.

We have carefully selected a range of images from nationally and internationally recognized photographers. The full beauty of the photo emerges when freed from frames and the glass that dulls color or causes glare,

Choose from dozens of extraordinary photographs

Innovative Photo Display System

Floating Photo

The highest quality photographic print is fused to an acrylic panel, then laser cut for a highly polished edge.

Magnet Disks

Raised acrylic disks with embedded magnets on the back of the acrylic panel create the floating effect.

Wall Mount

The steel wall mount levels itself, so is easy to accurately attach to the wall. It has magnets for the photo to snap into place, which also allows for easy change-out to a new image (fits four different sized photographs).

The wall mounts for smaller images come with an adaptor which allows for tabletop display.

Some images are also available in vertical format

For more information or to place an order go to www.sentiam.com

- Dozens of superb photographs are available from which to choose, in sizes ranging from 5"x15", to 15"x30", depending on the photographic image.
- A finished product will be shipped to you within two weeks of your online order.

Have your own photographs mounted on our display system

- We also provide the option for you to upload your own digital photos online.
- We will print your image using the highest quality photo paper and printing process, then mount it into our display system. We call this the "Bring Your Own Photograph" service, or BYOP.
